PROFILE

Second-year Computer Science student at Universiti Teknologi PETRONAS (UTP) with hands-on experience across full-stack development, database systems, and applied AI projects. Backed by a strong algorithmic track record, competition experience at national and international levels, and proven leadership roles across campus organizations. Currently seeking a **Software Engineer internship** placement from **January 2027 to August 2027**.

EDUCATION

Universiti Teknologi PETRONAS (UTP), Seri Iskandar

Bachelor of Computer Science (Hons.), CGPA: 3.86

May 2025 - Present

Coursework Projects:

- **Airbnb Database System (Oracle SQL):** Designed 37 relational tables (22 entity, 15 junction) with EERDs, DDL schemas, and complex DML queries involving multi-table joins, aggregations, and views
- **Space Shooter (C# & .NET 9):** Built a 2D wave-based game using *MonoGame* with 10+ modular OOP classes handling state machines, collision physics, power-up logic, and audio systems.
- **Smart Parking System (C++):** Developed a console application managing a 25-slot real-time parking grid with ID-based check-in/out tracking and robust input validation using structs, vectors, and 2D arrays.

SKILLS

Programming Languages: Python, MySQL, C++, C#, Java, HTML, CSS, JavaScript, TypeScript

AI/ML: NumPy, Pandas, Matplotlib, PyTorch, Scikit-Learn, LLM APIs (OpenAI, Groq), Vercel AI SDK

Web/Mobile Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Framer Motion, Vite, React Native, Expo, NativeWind

Development Tools: VS Code, Google Colab, Command-Line Interface, Git, GitHub, Node.js, Vercel, Supabase, PostgreSQL, Drizzle ORM, Clerk, Sentry

Software: Word, Excel, PowerPoint, Power BI, Google Workspace

Languages: Malay (Native), English (Fluent), Mandarin (Basic), Bahasa (Basic)

PROJECTS

Path OS (Competition, [Demo Available](#))

May 2026 - Aug 2026

Next.js, React 19, Supabase, GPT 5.6 Luna, Vercel AI SDK

- Designed an AI career coach that autonomously decides which of 3 specialized tools to call (Dijkstra-based career-graph traversal, salary benchmarking, application tracking), averaging 27.6% faster responses than a generic AI web-search baseline while personalizing every answer to the candidate's profile.
- Built a two-sided platform connecting candidate profiles directly to employer hiring pipelines, a structure most career tools skip by serving only one side, with real-time streaming responses in the coach chat.

Duply (Personal, In Development)

Jul 2026 - Present

Expo/React Native, Next.js, Postgres / Drizzle, Clerk, Inngest, Groq

- Developed an AI parsing pipeline that converts unstructured assignment briefs into grade-weighted deliverables and effort-balanced task splits via a greedy LPT bin-packing algorithm, structuring real UTP briefs in 2.3 seconds on average across a 75% pipeline success rate.
- Orchestrated 4 automated background workflow types (Inngest) spanning the full group lifecycle, from at-risk flags and peer check-in scheduling through to an immutable archived contribution snapshot at project close.

Portfolio Website (Active Development, [Demo Available](#))

Apr 2026 - Present

React 19, Vite, Tailwind CSS v4, Framer Motion

- Personal site with tag-filtered project pages, an MDX-powered blog, and Framer Motion-driven routing.

COMPETITIONS

2nd Place, International PBL Expo 2026 (Web and Mobile Application)

Sept 2026

Silver Medal, Malaysia-Japan International Conference

Jan 2026

Gold Medal, Virtual Innovation Competition Exhibition

Nov 2025

Gold Medal, Malaysia Invention & Innovation Expo

May 2025

2nd Runner Up, Top Coder National Level

Oct 2025

Champion, Top Coder University Level

July 2025

CERTIFICATIONS

Full Stack Web Development Program Certificate, Finlatics

Sept 2026

Data Science and Machine Learning Program Certificates, Finlatics

May 2026

Python (Basic) Certificate, HackerRank

Mar 2026

CAMPUS INVOLVEMENTS

Project Manager, Waves of Change: AI Literacy Programme | *University Social Responsibility* Jun 2026 - Sep 2026

- Earned an 87.5% recommend rate from surveyed participants after directing a 20-person UTP committee to design and deliver a four-module AI literacy curriculum for 40 Form 3 students at MCKK.
- Secured and managed over RM6,000 budget across 4 sponsors, overseeing stakeholder liaison with UTP management, the advisor, and school administration.

Project Director, MathEZ | *Rakan Masjid UTP* Oct 2025 - Nov 2025

- Secured over RM1,000 in revenue and sponsorships; over 90% of students reported improved understanding and exam performance.
- Directed a 14-person team to run a paid 1-to-1 tutoring programme for 10+ high school students, managing budgeting, logistics, and documentation.

Head of Cluster Dakwah, Rakan Masjid UTP Jan 2026 - Present

- Leads 8 committee members and 60+ general members, coordinating 5+ programmes each semester across planning, execution, and reporting.
- Authored the Dakwah cluster's standardized guideline document (objectives, job scopes, KPIs, documentation), now the reference point committee members turn to for resolving role conflicts and functional misunderstandings across all 5+ semester programmes.

Trainer, Intro to GitHub Workshop | *Google Developer Student Club UTP* Jul 2026

- Designed and delivered a hands-on GitHub workshop for 11 first-time users, 90% of whom entered as true beginners, pairing a custom repo and facilitator guide with pre/post-workshop materials; earned a 4.7/5 average experience rating.
- All 11 participants independently completed their first commit, push, and pull request by the end of the session, with 100% of surveyed attendees reporting they gained new GitHub skills.
