PROFILE

Second-year Computer Science student at Universiti Teknologi PETRONAS (UTP) with a strong interest in AI, machine learning, and software development. Backed by a strong algorithmic track record and hands-on experience building full-stack and agentic AI systems. Represented UTP in national and international competitions and holds proven leadership roles in campus organizations. Currently seeking a Software Engineer / AI Developer internship placement from January 2027 to August 2027.

EDUCATION

Universiti Teknologi PETRONAS (UTP), Seri Iskandar

Bachelor of Computer Science (Hons.), CGPA: 3.84

May 2025 - Present

Relevant Courses: Algorithms & Data Structures, Artificial Intelligence, Software Engineering, Data Communication & Network, Computer Systems

Coursework Projects:

- **Airbnb Database System** (Oracle SQL): Designed 37 relational tables (22 entity, 15 junction) with EERDs, DDL schemas, and complex DML queries involving multi-table joins, aggregations, and views
- **Space Shooter** (C# & .NET 9): Built a 2D wave-based game using *MonoGame* with 10+ modular OOP classes handling state machines, collision physics, power-up logic, and audio systems.
- **Smart Parking System** (C++): Developed a console application managing a 25-slot real-time parking grid with ID-based check-in/out tracking and robust input validation using structs, vectors, and 2D arrays.

Foundation of Science in Computer Science, CGPA: 3.98

May 2024 - Apr 2025

Relevant Courses: Problem Solving & Programming, Visual Programming, Mathematics I & II, Introduction to Business Information Systems

SKILLS

Programming Languages: Python, MySQL, C++, C#, Java, HTML, CSS, JavaScript

Web/Frontend: React, Tailwind CSS, Framer Motion, Vite

AI/ML: PyTorch, NumPy, Scikit-Learn, Pandas, Matplotlib, Matlab

Development Tools: VS Code, Google Colab, Command-Line Interface, Node.js, Vercel, Supabase, Git, GitHub

Software: Word, PowerPoint, Power BI, Excel, Google Workspace

Languages: Malay (Native), English (Fluent), Mandarin (Basic)

PROJECTS

Path OS (Competition, [Demo Available](#))

May 2026 - Aug 2026

Next.js, React 19, Supabase, GPT 5.6, Vercel AI SDK

- Built an autonomous agent pipeline with dynamic tool calling for career-graph traversal, salary benchmarking, and application tracking, powered by GPT-5.6 via the Vercel AI SDK.
- Engineered a two-sided matching platform linking candidate profiles to employer pipelines, with streaming AI responses in the coach chat.

Duply (Personal, In Development)

Jul 2026 - Present

Expo/React Native, Next.js, Postgres / Drizzle, Clerk, Inngest, Groq

- Developed an AI parsing pipeline (*Groq*) that converts unstructured assignment briefs into grade-weighted deliverables and effort-balanced task splits.
- Orchestrated automated background workflows (*Inngest*) for at-risk flags, peer check-in scheduling, reminders, and an immutable archived contribution snapshot.

Portfolio Website (Active Development, [Demo Available](#))

Apr 2026 - Present

React 19, Vite, Tailwind CSS v4, Framer Motion

- Personal site with tag-filtered project pages, an MDX-powered blog, and client-side routing.

COMPETITIONS

Silver Medal, Malaysia-Japan International Conference

Jan 2026

Gold Medal, Virtual Innovation Competition Exhibition

Nov 2025

Gold Medal, Malaysia Invention & Innovation Expo

May 2025

2nd Runner Up, Top Coder National Level

Oct 2025

Champion, Top Coder University Level

July 2025

CERTIFICATIONS

Data Science and Machine Learning Program Certificates, *Finlatics*
Python (Basic) Certificate, *HackerRank*

May 2026
Mar 2026

CAMPUS INVOLVEMENTS

Project Manager, Waves of Change: AI Literacy Programme | *University Social Responsibility* Jun - Sep 2026

- Directed a 20-person UTP committee to plan and deliver a full-day AI literacy programme for 60 Form 3 students at MCKK.
- Secured and managed over RM5,000 budget across 4 sponsors, overseeing stakeholder liaison with UTP management, the advisor, and school administration.

Speaker, Intro to GitHub Workshop | *Google Developer Student Club UTP* Jul 2026

- Taught GitHub fundamentals to 11 participants through a hands-on repo, facilitator guide, and pre/post-workshop materials.
- All 11 participants independently completed their first commit, push, and pull request by the end of the session.

Head of Cluster Dakwah, Rakan Masjid UTP Jan 2026 - Present

- Lead 8 committee members and 60+ general members, overseeing 5+ programmes each semester.
- Authored a cluster-wide guideline document (objectives, job scopes, KPIs, documentation) adopted across all 5+ semester programmes.

Project Director, MathEZ | *Rakan Masjid UTP* Oct 2025 - Nov 2025

- Directed a 14-person team to run a paid 1-to-1 tutoring programme for 10+ high school students, managing budgeting, logistics, and documentation.
- Secured over RM1,000 in revenue and sponsorships; over 90% of students reported improved understanding and exam performance.
