PROFILE

Second-year student majoring in Computer Science at PETRONAS University of Technology (UTP) with a passion for Artificial Intelligence, Machine Learning and software development. I enjoy building things from the ground up, whether that is a game, a database system, or a web app. Outside technical work, I take on leadership roles and have represented UTP in national and international competitions.

I am currently seeking internship opportunities where I can get actual hands-on experience and contribute to building things.

EDUCATION

PETRONAS University of Technology (UTP), Seri Iskandar

Bachelor of Computer Science (Hons.), CGPA: 3.84

May 2025 – Present

PETRONAS University of Technology (UTP), Seri Iskandar

Foundation of Science in Computer Science, CGPA: 3.98

May 2024 – Apr 2025

Sekolah Menengah Kebangsaan Kulai Besar, Kulai

Malaysian Certificate of Education (SPM), 8A+ 1A

Jan 2019 – Jan 2024

SKILLS

Programming Languages

Python, MySQL, C++, C#, Java, HTML, CSS, JavaScript

Libraries & Frameworks

React, Tailwind CSS, Framer Motion, MonoGame, Vite, PyTorch, NumPy, Scikit-Learn, Pandas, Matplotlib

Development Tools

Visual Studio Code, Google Colab, Command-Line Interface, Node.js, Vercel, Supabase, GitHub, Power BI, Excel

PROJECTS

Portfolio Website

Apr 2026

- Personal site built with React 19, Vite, Tailwind CSS v4, and Framer Motion.
- Features tag-filtered project pages, a notes/blog section powered by MDX, and client-side routing via React Router v7.

Airbnb Database System

Mar 2026

Data and Information Management Coursework, UTP

- Relational database modeled on a rental platform with 37 tables (22 entity, 15 junction).
- Built using Oracle SQL covering full lifecycle: EERD design, DDL scripts, and 5 DML query scenarios with joins, aggregations, and views.

Space Shooter

Nov 2025

Object-Oriented Programming Coursework, UTP

- 2D wave-based shooter built in C# using MonoGame and .NET 9.
- Built with OOP principles across 10+ classes covering enemy types, projectile collision, power-ups, audio, and game state management.

Smart Parking System

July 2025

Structured Programming Coursework, UTP

- Console-based C++ parking management system for 25 slots with real-time grid display, ID-based entry/exit tracking, and input validation.
- Built with structs, vectors, and 2D arrays.

Paradise Shoes

Apr 2023

High School CS Project

- Full-stack shoe store management system built with PHP, MySQL, and HTML/CSS.
- Supports separate admin and user roles with inventory management, product comparison, and a relational database backend.

CERTIFICATIONS

Python (Basic) Certificate

Mar 2026

HackerRank

Data Science and Machine Learning Program

May 2026

Finlatics

COMPETITIONS

- **Silver Medal**, Malaysia-Japan International Conference 2026 Jan 2026
- **Gold Medal**, Virtual Innovation Competition Exhibition 2025 Nov 2025
- **Gold Medal**, Malaysia Invention & Innovation Expo 2025 May 2025
- **3rd Place**, Top Coder 2025 National Level Oct 2025
- **Champion**, Top Coder 2025 University Level July 2025

ACTIVITIES AND INVOLVEMENTS

Media Committee

Young Scientist Camp 7
2025

May

- Produced engaging visual content through photography and videography to document camp activities and participant experiences.

Vice Secretary

Down To Earth, USR

Feb 2025

- Coordinated administrative tasks including meeting minutes, proposal writing, and internal communication.

Assistant Project Director

Spiritual Arts and Faithful Reflection to Bank Islam Kuala Lumpur

Jan 2025 – Feb 2025

- Ensuring streamlined communication between participants and managed participant registration.

Head of Media Department

Forum Adab Before Knowledge and Dean's List Awards Sept 24 Semester

Sep 2024 – Jan 2025

- Led a creative media team to develop promotional content, event photography, and videography.
